

PLEASE READ THE LABEL COMPLETELY BEFORE USE

PRECAUTIONS

Avoid contact with skin and eyes.
Wash hands and exposed skin before meals and after work.

WITHHOLDING PERIODS

It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand Maximum Residue Limits of Agricultural Compendium Food Standards.

Meat: Sheep-producing meat and/or its former intramuscular meat will be reagent-free during a 14 day withdrawal period.

Milk: Milk intended for sale for human consumption must be discarded for 70 days following treatment.

Wool Residues
Treat for 10 days between dipping and subsequent shearing to at least 100% of the wool to be treated for lice.

ACTIVE INGREDIENT
Orion™ LIQUID contains 500g/litre of the active ingredient.

GENERAL INFORMATION
Orion™ LIQUID is a non-stinging repellent dip which will give up to 12 weeks residual protection against lice (created by all the commonly found species) from treating the Australian Green Shaggy (Wool) sheep.

A dilute solution of product may occur if Orion™ LIQUID is applied incorrectly. If there is excessive faecal soiling or if wet conditions such as chronic dermatitis occur, the sheep should be treated with a dipping treatment that will reduce the protection period provided by Orion™ LIQUID.

DIRECTIONS FOR USE
Do not use water mixed with this dip, obtaining expert advice where necessary, to avoid unnecessary pain and distress while using the product other than as directed on the label.

Made by:
Orion Ltd

USE RATE

FOR LONGER TERM PROTECTION (up to 12 weeks)
Mix 2 litres of Orion™ LIQUID with 1000 litres of water and apply by showering, plunge dipping or spraying. Top up at the same rate.

Residue free is a non-dipping dip, no re-dipping is required.

FOR MEDIUM TERM PROTECTION (up to 6 weeks)
Mix 1 litre of Orion™ LIQUID with 1000 litres of water and apply by showering or plunge dipping. Do not use this rate for hand dipping or through-spray cases. Top up at the same rate.

Residue free is a non-dipping dip, no re-dipping is required.

STORAGE
Store in original container, tightly closed, away from direct sunlight, in a cool, dry place, avoiding temperatures below 0°C and above 35°C.

WARRANTY
The manufacturer of this animal health pharmaceutical is the supplier and warrants that this animal health is suitable for the purposes for which it is recommended, provided that the purchaser uses the remedy only for the purposes for which it is recommended and strictly in accordance with the directions on the container.

Registered pursuant to the ADGM Act 1985 No. A11117

PRECAUTIONS

Avoid contact with skin and eyes.
Wash hands and exposed skin before meals and after work.

WITHHOLDING PERIODS

It is an offence for users of this product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Food Standards.

Meat: Sheep producing meat and offal for human consumption must not be slaughtered during or within 7 days of the last treatment.

Milk: Milk intended for sale for human consumption must be discarded for 35 days following treatment.

WOOL RESIDUES

Ensure the time between dipping and subsequent shearing is at least five months, except in the case of spot treatment for flystrike. For advice on your dipping programme contact your supplier.

ACTIVE INGREDIENT

CYGUARD™ LIQUID contains 500g/litre cyromazine in the form of a water soluble concentrate.

GENERAL INFORMATION

CYGUARD LIQUID is a non-stripping saturation dip which will give up to 12 weeks residual protection against flystrike caused by all the commonly found strike flies including the Australian Green, Blowfly (*Lucilia cuprina*).

A shorter period of protection may occur if CYGUARD LIQUID is applied incorrectly, if there is excessive fleece soiling or if wet infections such as mycotic dermatitis (fleece rot) are present. Prolonged heavy rain following treatment may also reduce the protection period provided by CYGUARD LIQUID.

DIRECTIONS FOR USE

By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label.

USE RATE

FOR LONGER TERM PROTECTION (up to 12 weeks)
Mix 2 litres of CYGUARD LIQUID with 1000 litres of water and apply by showering, plunge dipping or jetting. Top up at the same rate. Because this is a non-stripping dip, no reinforcement is required.

FOR MEDIUM TERM PROTECTION (up to 6 weeks)
Mix 1 litre of CYGUARD LIQUID with 1000 litres of water and apply by showering or plunge dipping. **Do not use this rate for hand jetting or through spray races.** Top up at the same rate. Because this is a non-stripping dip, no reinforcement is required.

STORAGE

Store in original container, tightly closed, away from direct sunlight, in a cool, dry place, avoiding temperatures below 0°C and above 35°C.

WARRANTY

The manufacturer of this animal remedy extends grants to the purchaser a warranty that this animal remedy is reasonably fit for the purposes for which its use is recommended, provided that the purchaser uses the remedy only for the purposes for which it is recommended and strictly in accordance with the directions on this container.
