

INFORMATION SHEET

Anthem[®]

Sheep Hi Min

FOR SHEEP

A double action combination drench containing both levamisole and albendazole which is a member of the benzimidazole family. ANTHEM[®] SHEEP HI MIN is effective against internal parasites sensitive to one or both of these families.

CONTROL AND TREATMENT

For the control of sensitive mature and immature *Haemonchus*, *Ostertagia*, *Trichostrongylus*, *Nematodirus*, *Cooperia*, *Strongyloides*, *Bunostomum*, *Oesophagostomum*, *Chabertia*, *Trichuris*, *Dictyocaulus*, *Moniezia* and adult liver fluke in sheep. Resistance can develop to any anthelmintic. Ask your local veterinary practitioner or animal health advisor for recommended parasite management practices for your area to reduce development of resistance. It is advisable that a resistance test be conducted regularly when using any parasite treatment.

BENEFITS

- Combines two anthelmintics with alternative modes of action
- Prevention of selenium deficiencies
- Includes minerals and selenium
- Standard 1mL/5kg sheep dose rate
- Control of BZ and levamisole resistant parasites

DOSE RATE

1mL / 5kg

WITHHOLDING PERIODS

It is an offence for users of the product to cause residues exceeding the relevant MRL in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Food Standards.

Milk: Milk intended for human consumption or manufacture for human consumption must be discarded during treatment and for 35 days following the last treatment.

Meat: Animals producing meat or offal for human consumption must not be sold for slaughter either during treatment or within 10 days of the last treatment.

ACTIVE INGREDIENT

37.5g/L levamisole 23.8g/L albendazole HCl. Each 10mL dose contains 5mg selenium, 2.5mg cobalt and 21mg copper
