

GrainMaster[®] SuperSmoke[®]

INSECTICIDE SMOKE GENERATOR

A new dual mode of action insecticide for control of beetles, mites, moths and weevils in empty silos and grain stores

ACTIVE INGREDIENT

100 g/kg pirimiphos-methyl and 50 g/kg deltamethrin

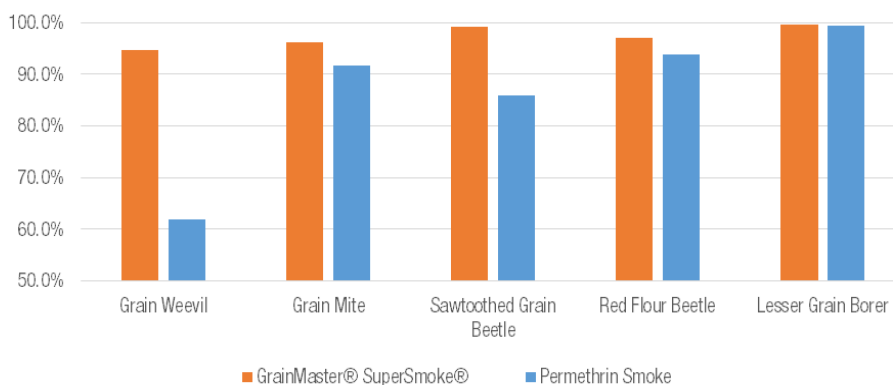

PRODUCT ATTRIBUTES

From the makers of Actellic[®] Smoke Generators the new GrainMaster[®] SuperSmoke[®] is a world first dual active ingredient smoke generator that provides superior control of key stored grain pests such as Grain Weevil. GrainMaster SuperSmoke combines two of the world's leading stored grain active ingredients into one easy to use product. Pirimiphos methyl is already well known as the ingredient in the Actellic range. Deltamethrin is a highly active second generation pyrethroid with proven performance for control of stored grain pests in the UK and many other countries.

Test results have demonstrated that the twin active ingredient combination in GrainMaster SuperSmoke gives superior control of Grain Weevil and Sawtoothed Grain Beetle compared to a single active ingredient product containing permethrin.

Efficacy Evaluation of Smoke Generator Products
% Knock-down and Mortality

Independent UK trial data

One 60g GrainMaster SuperSmoke generator treats a grain store with capacity of up to 250MT of barley, 200MT of wheat and 150MT of oats.
