

**orion** AGRISCIENCE

KEEP OUT OF REACH OF CHILDREN

# Dusk<sup>TM</sup>

## SLUG AND SNAIL BAIT

Enhanced Durability  
High Coverage  
Weather Resistant Formulation

**Active Ingredient:**

6.7 g/kg of iron in the form of a granular bait

9 421004 533461

**20 kg**

## PLEASE READ THE LABEL COMPLETELY BEFORE USE

### HAZARD CLASSIFICATION: Designed for biocidal action

**Precautions:** Keep out of reach of children. Store in the original container. Wash hands after use. Do not apply directly into or onto water.

**Disposal:** Dispose of this product by using in accordance with this label. Dispose of packaging to a suitable landfill.

### FIRST AID

If medical advice is needed, have product container or label at hand.

For advice, call the Poisons Centre on **0800 POISON (0800 764 766)** or a Doctor.

### EMERGENCY RESPONSE

In an emergency call **111, Police or Fire Brigade**. For specialist advice in an emergency only, call **0800 CHEMCALL (0800 243 6225)** (24 hrs).

### SAFETY DATA SHEET

Additional information is provided in the safety data sheet. Freephone **0800 ORIONAS (0800 674 6627)** or visit **www.orionagriscience.co.nz**

### GENERAL INFORMATION

Dusk is a highly effective slug and snail killer. The pellet contains 54 g of iron EDTA complex. Once slugs and snails have fed on the pellet, the iron is released from its bound form in the gut, and is uniquely toxic to slugs and snails. Dusk is safe to use, and is safe around animals, pets and birds. It does not harm earthworms. Dusk granules are optimally sized to allow for effective ground coverage for enhanced crop protection.

As Dusk does not work through paralysis, slugs and snails move away after feeding. There may therefore be no dead slugs or snails visible after use.

Dusk can be used around seedlings or established plants in agriculture and horticulture.

Batch No:

Date of manufacture:

### DIRECTIONS FOR USE

**Broadcast:** Use 15 kg/ha. Application can be made before, during or after sowing. Apply evenly over the ground surface. For band application along rows, apply as close as possible to the plants. Application is best made after rain or irrigation when slugs and snails become more active. Do not apply onto edible plant parts.

**Drilling with seed:** Use 10 kg/ha. Apply through the granule applicator hopper or mixed in with the seed. Only use where the drill leaves an open slot allowing slugs access to the baits. Otherwise broadcast the baits as above.

When stored appropriately this product should show no significant degradation for 2 years from the date of manufacture. Contact your supplier for further information about the use of product that is older than this.

### WARRANTY

This formulation is warranted to contain the specified active ingredient within accepted analytical tolerance when packed. The user bears the risk for damage resulting from factors beyond the manufacturer's control. The manufacturer declines all liability for damage resulting from improper storage or use of the product.
